## **ABOUT ABLOOM**

---

Being one of the most celebrated up and comers of the garment industry we pride ourselves on producing the best quality garment products. Established in 2005, we grew exponentially from a 6000 sq feet dedicated for production to now 70,000 sq feet in 2020. During these 13 years we earned “Best supplier for on time delivery 2015”, “Supplier of the year 2015” and “Best supplier for Quality in South Asia 2018” from our trusted buyer Auchan. We are now a factory of 14 sewing lines, state of the art knitting, printing facilities and 1,000,000 capacity/month. The dyeing factory is going to have 20 tons of dyeing capacity per day.

## **MISSION AND GOALS**

---

In this very dynamic industry, we are thriving and excelling towards the future. We are planning to increase our set up to 20 lines. Our printing facility has 40,000 production capacities per day and the current 20 tons capacity of dyeing factory is going to be expanded to 30 tons, by the year 2025.

## **VISION STATEMENT**

---

Textile industry has spread a lot in the recent years. We have grown with it. Regarding the matter of what we want to do in the future is not something, which could be said with ease. Our directors are dedicated to take Abloom to the top. By the year 2020 our Dyeing factory will be running and in the future we want to work with multi-billion dollar companies, who have made their mark in the fashion world, companies like H&M, Mango, Target, ETC. We also have an aim to expand largely on the backward linking divisions.

## **CORPORATE SOCIAL RESPONSIBILITIES**

---

Being in one of the least developing country we understand that we have certain responsibilities firstly, towards our own employees, neighbors and the local community. Therefore every year few events are arranged to help the surrounding community. It brings us great pleasure to say that we have implemented the “Universal Healthcare Plan” collaborating with Weave Our Future and Bangladesh Diabetic Federation. This initiative makes sure that our employees get free treatment from doctors who are available in the factory 5 days a week, from 10 selected hospitals under diabetic foundation and 24 hours hotline phone number of doctors for assistance.
